

Ministry of Health & Family Welfare, Govt. of India has developed the e-Clearance for Afterlife Remains (e-CARE) portal: <https://ecare.mohfw.gov.in> to streamline and expedite the process of Public Health Clearance for transporting human remains to India from different countries.

By integrating all stakeholders on a single interface, including the consignee, Airport Health Organization, and the airlines, the portal will facilitate smooth and timely clearance of documents with automatic periodic alerts and live status tracking. The e-CARE User Manual and a FAQs document are also available on the portal.
